

Git Workshop Installations

Git Installation

Windows

Download and install git for windows: <https://git-scm.com/downloads>

Mac OSX

Easiest installation is to try to use git and install the XCode Command line tools via the Apple store.

Open terminal

Type **git version**

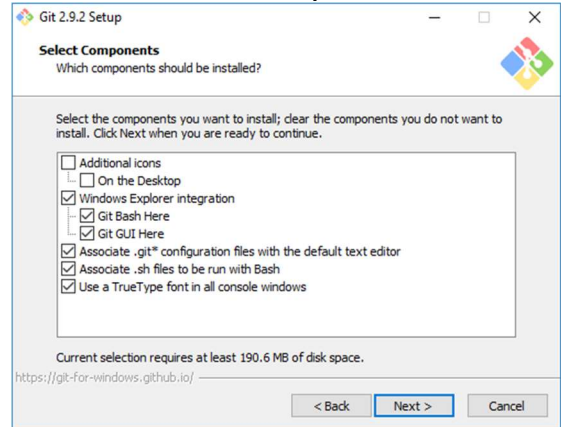

Add the desktop icon if you wish.

The following are the installation options on Windows (mac might be different).

1 GNU General Public License

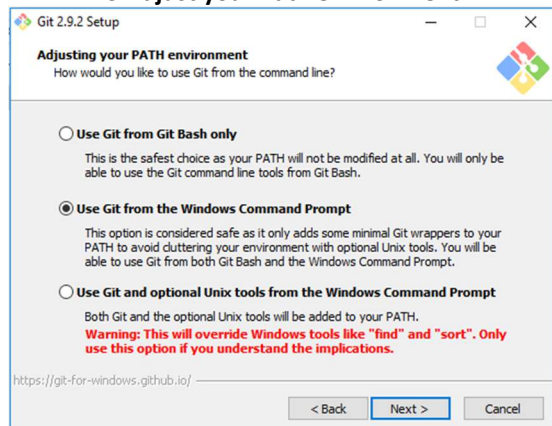

2 Select Components

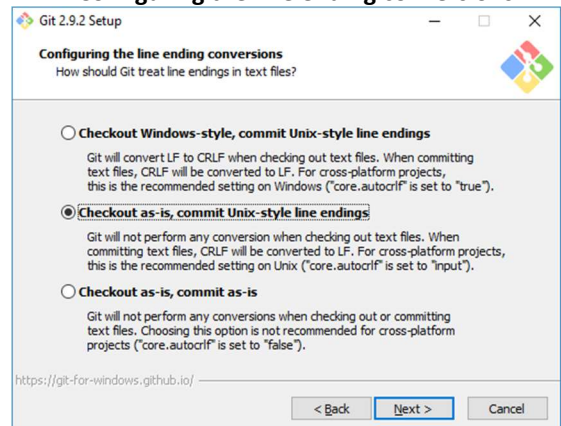

Add desktop icon, if you wish.

3 Adjust your Path environment

Use the middle option for use in Git Bash & Windows Command Prompt.

4 Configuring the line ending conversions

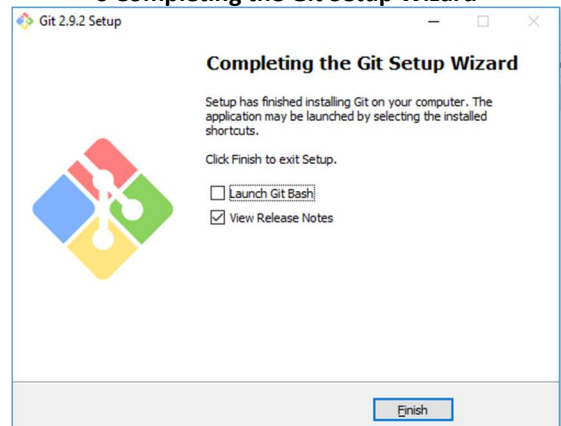

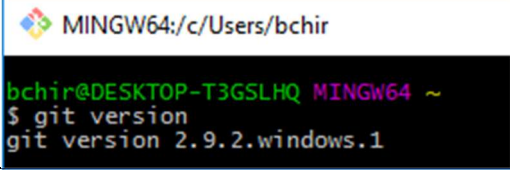

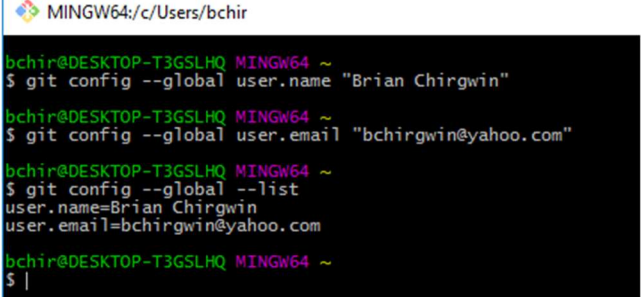

Use the checkout as-is, commit Unix-style line endings

5 Configuring extra options

6 Completing the Git Setup Wizard

Verify Installation of git Open terminal on Mac or Git Bash on windows Type Git Version Git should respond with the version installed	 <pre> MINGW64:/c/Users/bchir bchir@DESKTOP-T3GSLHQ MINGW64 ~ \$ git version git version 2.9.2.windows.1 </pre>
Configure some git global settings Open a terminal or git bash window and type the following git config --global user.name "<your name>" git config --global user.email "<your email>" Verify global settings git config --global --list	 <pre> MINGW64:/c/Users/bchir bchir@DESKTOP-T3GSLHQ MINGW64 ~ \$ git config --global user.name "Brian Chirgwin" bchir@DESKTOP-T3GSLHQ MINGW64 ~ \$ git config --global user.email "bchirgwin@yahoo.com" bchir@DESKTOP-T3GSLHQ MINGW64 ~ \$ git config --global --list user.name=Brian Chirgwin user.email=bchirgwin@yahoo.com bchir@DESKTOP-T3GSLHQ MINGW64 ~ \$ </pre>

Create Github Account

Go to <https://github.com> and sign up for an account, if you do not already have one.

Post your github account user name to the meetup comments or send a personal message to Brian Chirgwin (organizer) so I can add you to Code Norman on github.

NodeJS Installation

Download and install nodejs version v6.5.0: https://nodejs.org/en/ Verify Node Install node --version will return the version of node	 <pre> MINGW64:/c/Users/bchir bchir@DESKTOP-T3GSLHQ MINGW64 ~ \$ node --version v6.5.0 </pre>
---	--

Install IDE/texteditor

There are several editors or IDEs that can be used. The following is just a partial list. I will be using JetBrains WebStorm, but this is a paid product. You can get a 30 day trial. I recommend Visual Studio Code:

Visual Studio Code: <https://code.visualstudio.com/> Intro videos here: <http://code.visualstudio.com/docs/introvideos/overview>

JEdit: <http://www.jedit.org/>

Atom: <https://atom.io/>

Brackets: <http://brackets.io/>

Workshops

For a head start the following tutorials will be options at the September meeting.

Try git: <https://try.github.io/levels/1/challenges/1>

Git-it: <https://github.com/jlord/git-it-electron>

Releases are here: <https://github.com/jlord/git-it-electron/releases>

Think like a git: <http://think-like-a-git.net/sections/about-this-site.html>

The following items will not be needed until October's meetup, but you can install them now.

Install Chrome & Postman Chrome App

Install **Chrome** if you do not already have it installed. <https://www.google.com/chrome/browser/desktop/>

Install **Postman** <https://www.getpostman.com/>

Postman is an app that allows sending HTTP requests to a server.
